

# Introducing D-Cerno AE

Quick, Easy, Hybrid

Never before has it been more crucial to understand and be understood correctly during a meeting. That's why an easy-to-use and reliable discussion system is now essential. Being able to set up in record time, integrating with existing AV equipment or effortlessly working together with hybrid meeting platforms, D-Cerno has it all. D-Cerno: Quick to set up, Easy to integrate, Hybrid-ready.

## D-CERNO AE

The D-Cerno central unit offers quick installation, built-in or external recording, and seamless 3rd-party integration. The dual USB ports, network-based AES-67 connection and analog I/O provide a flexible interface to a PC, hybrid meeting platform, DSPs or external AV equipment. Routing the audio to the correct interface is made easy with the audio configuration capabilities.

## D-CERNO SL

With its sleek and compact form factor, D-Cerno SL guarantees zero mobile-phone interference and a great digital sound quality. It is equipped with tactile buttons, braille indicators, headphone connections and volume control. The chairperson units have dedicated functionalities with Next-in-line and Priority buttons.

## D-CERNO FLUSHMOUNT

Smooth and discreet, the D-Cerno Flushmount units are a digital microphone flush-mount panel intended for basic discussion systems. It offers a crystal clear sound and excellent intelligibility. Thanks to its small form factor and elegant casing, you can easily blend it in with your meeting room furniture. The panel also has an on/off tactile microphone push button and an integrated LED light to indicate the mic status.

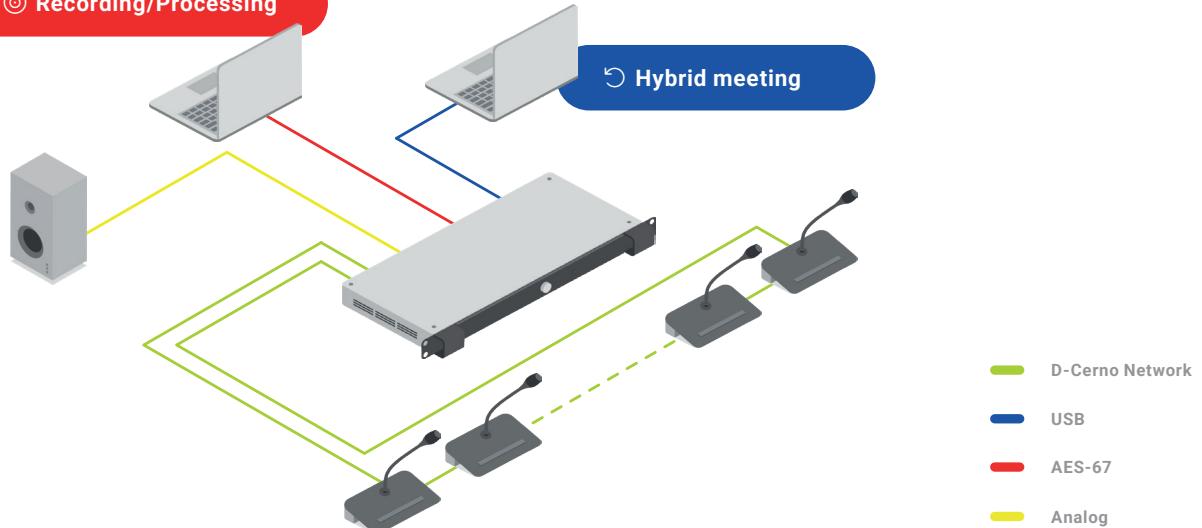

## D-CERNO NEXT

The D-Cerno NEXT enables network expansion, allowing up to 50 additional delegate units to be connected to the D-Cerno AE. Multiple D-Cerno NEXT units can be linked, supporting a maximum of 250 delegate units in a single system. Its four ports simplify cabling and enhance system reliability by creating redundancy, ensuring functionality even in the event of a cable break.

## ⌚ Recording/Processing

## ⌚ Hybrid meeting

### ⌚ Hybrid Ready

With the new D-Cerno central unit, setting up a hybrid meeting has never been easier. Connect an MTR or a PC via the direct USB interface and simply select D-Cerno as the preferred audio source. Integrate with a camera tracking solution by using the D-Cerno API.

### 🕒 Quick To Setup

Setting up a D-Cerno system is simple: just connect the discussion units to the central unit using a shielded CAT 5E cable or better, and power up. Each unit features two network ports, allowing easy daisy-chaining for streamlined setup. For added reliability, connect the units in a loop to ensure uninterrupted audio even in the event of a cable break.

### 🌐 Easy to Integrate

Need to integrate with an existing AV system? Use the wide range of connectivity options to make your integration quick and easy. No matter if you use AES-67, USB or balanced inputs/outputs, the audio configurator allows you to route the audio to where it needs to go. Controlling the D-Cerno system is done by using the wide API capabilities.

### ⌚ Ready to Record

Making a recording of your meeting is as simple as pushing the button on the central unit which will record the audio on the internal storage or a connected flash drive. Need to record the individual microphones? Use the multi-channel USB interface or AES-67 connection to record directly on your PC or 3rd party recording device.
