# D-Cerno DECIDE

Where discussions become decisions

**D-Cerno DECIDE** transforms the proven D-Cerno platform into a formal meeting solution with integrated voting capabilities. Built for city councils, local authorities, school boards, educational institutions, and courtrooms requiring decision-making, D-Cerno DECIDE eliminates add-on voting solutions by integrating professional voting directly into the familiar D-Cerno hardware.

## PERFECT FOR

- ✓ City Councils
- ✓ Courtrooms
- ✓ Local Authorities
- ✓ School Boards
- ✓ Educational Institutions

## — SIMPLE, SCALABLE LICENSING

### ⊕ L-DECIDE License

Per unit activation

Unlocks voting functionality, showing vote distribution in the signage, and downloadable reports for official documentation and compliance. Enables language selection and programmable button features.

### ⊕ D-Cerno Advanced License

Per central unit

Unlocks comprehensive microphone management via speaker lists, request queues, and room layout visualization. Enables seat labeling and enhanced voting reports.

### Professional Voting Technology

Five programmable voting buttons adapt to any procedure — from simple yes/no decisions up to 5 voting options.

### Real-Time Transparency

Voting results display instantly on web-based digital signage with room layout visualization showing vote distribution.

### Maximum Flexibility

Any unit becomes a Chairperson unit with a simple click — no dedicated hardware unit or physical modifications required.

### Custom Control Integration

General-purpose programmable button enables advanced API integrations, for example a concierge call, witness calling, or activating projector- and recording systems.

### Multilingual Support

Create multiple presets, and dynamically switch between them to adapt to different conference scenarios, either manually from the web interface or automated via the API.

### Built for Accessibility

Haptic feedback and tactile overlay ensure confident control for all users.

### Future-Proof Investment

Software-upgradeable architecture—start with basic discussion and add extra functionality like voting through licenses rather than hardware replacement.
